

Get Profit Adz Income Disclosure

The Get Profit Adz Compensation Plan offers exceptional opportunities. Our members can book both low cost advertising, as well as participate in these profits through revenue share and affiliate agency commissions.

Although the possibility is unlimited, individual results will vary depending on levels and sales skills of each participant according to commitment.

The following figures refer to estimates by the company pending a more detailed survey ready to be carried out after his first year. Based on industry standards and company projections, average annual gross income for Partners/Affiliates is projected to be \$ 100 and somewhere between \$ 4,000.

Since the program exist only nine months (since April 2015), there are no adequate statistical data in order to present a comprehensive income overview of all participants over a longer period of time.

Currently more than 60,000 partners are registered at Get Prifit Adz.

Although a few participants achieve even monthly incomes over \$ 100,000 on a regular basis, less than 1,5% of all participants have sufficient income from Get Profit Adz, to live as their sole source of income from it.

For most partners Get profit Adz is an extra income.

Although Get Profit Adz could reach immense increases in sales each month since its launch in April 2015, neither guarantees nor promises regarding future revenues and earnings opportunities can be given.
